DISCOVER THE LEXI-COMP ADVANTAGE
Clinicians Find Answers 6 Times Faster with Lexi-Comp

Find answers six times faster:
Lexi-Comp® ONLINE™ has consistently been rated higher than the competition on the basis of ease-of-use and ability to find answers quickly. With its intuitive interface and layout, Lexi-Comp ONLINE helps clinicians find direct answers to tough clinical questions six times faster than with other commonly used drug information resources.¹ By finding answers faster, you’ll increase efficiency and productivity while enhancing patient safety at the point-of-care.

Drive down your cost-per-use:
Do you know how frequently your current drug information resource is used? Do you know who uses it? Lexi-Comp ONLINE is used throughout the entire hospital by all clinicians – pharmacists, physicians and nurses. While pharmacists have long relied on Lexi-Comp ONLINE’s breadth and depth of drug information, physicians value the disease information within Harrison’s Practice, and nurses depend on the printable patient education leaflets (available in 18 languages) and Lexi-I.V. Compatibility. Cost-per-use plummets because more clinicians throughout the hospital access Lexi-Comp more often. Compare your usage stats to find out what your cost-per-use could be with Lexi-Comp ONLINE.

Get more for your money with two resources in one:
With Lexi-Comp ONLINE you’ll gain access to two independent drug information resources within the same interface – Lexi-Comp’s point-of-care content and AHFS’ comprehensive database – for the cost of one! With Lexi-Comp’s breadth and AHFS’ depth of content in one resource, you’ll get more for your money! You’ll also have peace of mind in knowing you can satisfy your requirement to validate clinical answers with two resources.

When it comes to providing superior cost savings and value, Lexi-Comp is second to none.

98% of our hospital clients renew Lexi-Comp ONLINE each year!

**Increase system-wide efficiency:**
Lexi-Comp ONLINE enables busy clinicians to find answers fast, increasing their efficiency so they have more time to perform other tasks. A recent study published in the Canadian Journal of Hospital Pharmacy in April 2010 determined Lexi-Comp ONLINE had an overall better layout and navigation than that of the competition – allowing users to find the answers they need quicker and more efficiently.

**Minimize switching costs with streamlined user training:**
With Lexi-Comp, training couldn’t be easier. Because of our easy-to-use interface and unique publishing model, we’ll have your entire staff up and running in no time – resulting in increased efficiency for your workforce. In fact, we recently trained clinicians at over 260 military treatment facilities worldwide in a matter of weeks! Lexi-Comp is so easy to use that you’ll find it effortless to train users who may be unfamiliar with the product.²

*Concerned about the cost of switching to Lexi-Comp ONLINE? Don’t be!*
Even though less familiar with Lexi-Comp, participants in a recent CJHP study found Lexi-Comp ONLINE so easy to navigate that they rated it the “most preferred” resource among those evaluated.²

*Why are more hospitals switching to Lexi-Comp?*
Over the past year, more than 190 hospitals have switched from their existing drug information provider to Lexi-Comp. In March, the Military Health System (MHS) made the switch to Lexi-Comp – giving 31,000 clinicians at more than 260 military treatment facilities worldwide access to Lexi-Comp’s trusted drug information.

**The Lexi-Comp Advantage**
These hospitals recognized that by delivering faster answers to more clinicians, Lexi-Comp helped maximize their bottom line, increase the efficiency and productivity of their workforce, and ultimately improve patient outcomes.
The Point-of-Care Drug Information Solution for Pharmacists, Physicians and Nurses

A subscription to Lexi-Comp® ONLINE™ includes:

• **Access to multiple databases**, designed for use at the point-of-care for pharmacists, physicians and nurses

• **In-depth drug information** with AHFS

• **Interactions**: a complete drug and herbal interaction analysis

• **Drug Identification**: quick identification of unknown medications based on imprint, dosage form, shape and color

• **Calculations**: over 50 medical calculations designed to assist with drug dosing, drip rates and organ function assessment for adults and children

• **Patient Education**: personalized materials in 18 languages

• **I.V. Compatibility**: through partnership with King® Guide to Parenteral Admixtures®, provides a user-friendly view of compatibility and stability of drugs and solutions by route of administration

• **Toxicology**: fast access to toxicology information, including toxicology-specific calculators and drug identification in one essential tool

• **Drug Allergy**: provides fully-referenced, detailed information on drug allergy issues such as cross sensitivity, range of reaction and patient management

• **Pregnancy and Lactation**: provides fully-referenced, detailed information on the use of medication in pregnancy and lactation, including a full review of animal and human data

---

"We've been with Lexi-Comp through much advancement in technology – and they've always been ahead of the competition. I wouldn't change drug information providers for anything. With Lexi-Comp, I get exceptional service from a family-oriented company, industry-leading information and superior functionality."

Sarah C. Erush, PharmD, BCPS, The Children’s Hospital of Philadelphia

"When we switched from our old drug information provider to Lexi-Comp ONLINE, we saved $40,000 annually. Our clinicians accepted the change immediately and we haven’t missed our old provider once. It was a winning situation all around."

Stephen E. Melvin, PharmD, BCPS, Bay Medical Center
